Eleanor/Omar:

See attached maps. Please review and let's discuss what you guys may need to complete your closure requirements and if we can assist in the process while we are doing the cleanup I would like to try to do that or possibly Omar could have his contractor potentially complete those items that I may not be able to complete.

We will be demolishing the on-site building on Friday, November 9. We anticipate starting the excavation activities on EAS03 and moving east and then south to north.

Let's discuss as soon as possible.
